

Po Yi Zhi

Senior Software Engineer

Senior Frontend Software Engineer with 7 years of engineering experience. Experienced in designing and delivering scalable **React and TypeScript** applications for healthcare and enterprise systems, with strong expertise in frontend architecture, reusable component design, data visualization, performance optimization, and modern UI development. Passionate about building maintainable software, improving developer productivity, and collaborating with cross-functional teams to deliver high-quality products that solve real business problems.

Education

2015 - 2019
B.Eng (Honours) Mechanical Engineering

Multimedia University

Expertise

- Programming Languages:
  - JavaScript
  - TypeScript
  - HTML
  - CSS
- Frameworks/Libraries:
  - React
  - NextJs
  - Vue
  - NuxtJs
  - Material-UI
  - TailwindCSS
  - jQuery
  - ChartJs
  - Slate
  - Redux
  - Jest (unit test)
  - NodeJs
- Tools & Platforms:
  - Git/Github
  - NPM
  - Webpack

Professional Experience

05/2024 - Current

Renalworks Malaysia Sdn Bhd | Petaling Jaya

Senior Software Engineer

- **Feature Delivery & Product Ownership** - Owned frontend delivery across core clinical and operational workflows for a healthcare platform supporting approximately **90–110 centres** and **1,500–1,700 users**.
  - Delivered **150+ production-ready features** across **4 core modules and 1 supporting web application**, with primary contributions to **Clinical, Entity Management, Inventory Management, and Weight Data System**, using React, TypeScript, Redux, and Material UI.
  - Developed and enhanced inventory management workflows, improving medical supply tracking, reporting accuracy, and operational efficiency
  - Coordinated release activities across development and production environments, ensuring smooth deployments with minimal disruption to users.
- **Frontend Architecture & User Experience** - Built reusable frontend components with a focus on maintainability and consistent user experiences.
  - Built reusable UI components, reducing duplicated implementation and improving consistency across modules.
  - Designed interactive laboratory dashboards using Chart.js, helping clinicians visualize patient laboratory trends and make faster, data-driven decisions.
  - Evaluated and implemented new frontend capabilities, including data visualization, rich-text editing, and laboratory OCR.
- **Technical Leadership & Engineering Excellence** - Improved engineering quality by driving technical planning, architectural evaluation, and collaborative development practices.
  - Led **3 technical proof-of-concepts** for data visualization, rich-text editing, and laboratory OCR, researching suitable libraries and developing prototypes to demonstrate feature feasibility to Business Analysts; **all 3 PoCs were subsequently adopted as production features**.
  - Facilitated sprint planning and effort estimation using historical delivery metrics, improving planning accuracy and enabling more predictable sprint outcomes.
  - Improved overall test coverage from **60% to 75%** by expanding unit tests, updating existing test suites, and maintaining unit testing practices across development.

07/2023 - 04/2024

Red Ideas Sdn Bhd | Petaling Jaya

Junior Web Developer

- Proactively addressed and resolved software issues by diligently troubleshooting and fixing bugs, as reported through raised bug tickets.
- Managed module migration, strategically refactoring code to improve readability and performance.
- Executed a comprehensive revamp of logs for existing modules, improving tracking and monitoring capabilities for enhanced system management.
- Engaged in discussions with various departments to gather and understand their specific requirements, aligning development efforts with organizational objectives.

Project

- **RenalGenie**

A cloud-based electronic healthcare record (EHR) and clinical management system

Technologies used: React, TypeScript, Material-UI, Redux, ChartJs, Slate

- **JagaApp Admin Panel**

A property management admin panel

Technologies used: React, NextJs, Material-UI, Firebase

- **LVLY | Flowerchimp**

An online flower shop that offers wide selection of beautiful bouquets to suite any occasions in Australia & Southeast Asia.

Technologies used: HTML, CSS, JavaScript, jQuery, Shopify Liquid, Splide, Modaal

- **The Hacker Collective**

A landing page website to display services offered and company information

Technologies used: Nuxt3, JavaScript, TailwindCSS, HeadlessUI,

- **IFMY Block 9 Project**

Building renovation and mechanical systems design of an existing factory for semiconductor industry

Language

English

Chinese

Bahasa Malaysia

05/2022 - 07/2023

Limitless Technology Group | Kuala Lumpur

Front End Web Developer

- **E-commerce Development** - Built and enhanced Shopify storefronts to deliver engaging shopping experiences and support business growth.
  - Developed and maintained Shopify e-commerce storefronts by implementing custom features using **JavaScript**, **jQuery**, **HTML**, **CSS**, and **Shopify Liquid**.
  - Collaborated closely with designers and QA engineers to redesign the **FlowerChimp** shopping cart experience, simplifying the checkout journey and improving the overall user experience.
  - Revamped the **FlowerChimp** homepage and product pages to improve customer engagement, visual consistency, and product discoverability.
- **Frontend Modernisation** - Modernised storefront architecture to improve maintainability and support future platform enhancements.
  - Migrated legacy Shopify themes from Online Store 1.0 to Online Store 2.0, modernising storefront architecture and improving long-term maintainability.
- **Performance Optimisation** - Enhanced frontend performance and user experience through targeted optimisation strategies.
  - Optimised frontend performance using browser performance profiling, **reducing Cumulative Layout Shift (CLS) from 0.19 to 0.025** and improving Core Web Vitals and Lighthouse performance scores.
  - Improved website loading performance through code splitting, lazy loading, deferred scripts, and asset optimisation.

10/2021 - 04/2022

The Hacker Collective

Front End Web Developer

- Build reusable and maintainable components that helps to improve and speed up development processes
- Collaborated with backend developers and designers to deliver responsive, accessible, and cross-browser compatible web applications
- Built landing pages, form pages and marketing websites using modern frontend technologies while maintaining responsive design best practices using Nuxt3 and TailwindCSS with a team of 3 frontend developers and 1 backend developers

08/2019 - 10/2021

Durianê Professional Sdn Bhd | Melaka

Mechanical Engineer

- Prepared engineering proposals, cost estimations, and feasibility studies to support client decision-making during project planning
- Produced technical documentation, design specifications, tender documents, and evaluation reports, assessing contractor pricing, technical compliance, and project capabilities
- Designed fire protection systems for semiconductor manufacturing facilities and commercial buildings in compliance with Malaysia Standards (MS), NFPA, and FM requirements, ensuring regulatory approval and insurance compliance
- Coordinated with architects, surveyors, contractors, and multidisciplinary engineering teams to streamline design reviews, resolve technical issues, and ensure successful project delivery.

Volunteering

2023 - Current

Damansara Utama Methodist Church | Petaling Jaya

Camera crew in Audio-visual team
