SKILLS

- Programming Languages: JavaScript, TypeScript, CSS, HTML, Shopify Liquid
- Frameworks & Libraries: Vue, React, NuxtJs, NextJs, NodeJS, jQuery, Firebase, TailwindCSS, Material UI, Formik, React-hook-form, ChartJs, Slate, Redux, Jest
- Tools & Platforms: Git/GitHub, NPM, Webpack

PROJECTS

• RenalGenie

A cloud-based electronic health record (EHR) and clinic management system

Technology Used: React, TypeScript, Material UI, Redux, ChartJs, Slate

• JagaApp Admin Panel

A property management admin panel.

Technology Used: NextJs, JavaScript, Material UI, Firebase

• LVLV & Blomeroo

An online flower shop that offers a wide selection of beautiful bouquets to suit any occasion in Australia.

Technology Used: HTML, CSS, JavaScript, JQuery, Shopify Liquid

• FlowerChimp

An online flower shop that offers a wide selection of beautiful bouquets to suit

Senior Frontend Software Engineer with **7 years of engineering experience**, including **5 years in frontend software development** and **2 years in mechanical engineering**. Experienced in designing and delivering scalable React and TypeScript applications for healthcare and enterprise systems, with strong expertise in frontend architecture, reusable component design, data visualization, performance optimization, and modern UI development.

Passionate about building maintainable software, improving developer productivity, and collaborating with cross-functional teams to deliver high-quality products that solve real business problems.

PROFESSIONAL EXPERIENCE

May 2024 - Current

Senior Software Engineer *RenalWorks Malaysia Sdn Bhd*, Petaling Jaya, Selangor, Malaysia

- Delivered **150+ production-ready features** for a cloud-based Electronic Health Record (EHR) platform using **React, TypeScript, Redux, and Material UI**, expanding platform capabilities and enhancing clinical workflows.
- Conduct technical feasibility studies and proof-of-concepts (PoCs) for new product capabilities, evaluating architectural approaches and reducing implementation risks before development.
- Facilitated sprint planning and effort estimation by leveraging historical delivery metrics, improving planning accuracy and enabling predictable sprint outcomes.
- Reviewed pull requests to uphold engineering standards, improve maintainability, optimize performance, and promote knowledge sharing across the team.
- Built reusable and maintainable UI components, reducing duplicated implementation and improving development consistency across multiple modules.
- Implemented interactive laboratory dashboards using **Chart.js**, enabling clinicians to visualize patient laboratory trends and make faster, data-driven decisions.
- Developed and enhanced inventory management workflows, improving medical supply tracking, reporting accuracy, and operational efficiency.
- Resolved **50+ critical production issues**, performing root-cause analysis and delivering reliable fixes to maintain high system availability and minimize downtime.
- Coordinated release activities across development and production environments, ensuring smooth deployments with minimal disruption to users.
- Leveraged AI-assisted development tools to accelerate implementation, reduce repetitive work, and improve engineering productivity while maintaining high code quality.

July 2023 - April 2024

Junior Web Developer *Red Ideas Sdn Bhd*, Petaling Jaya, Selangor, Malaysia

any occasion in Southeast Asia.

Technology Used: HTML, CSS, JavaScript, JQuery, Shopify Liquid, Splide, Modaal

- **The Hacker Collective Website**

A landing page website to display services offered and company information.

Technology Used: Nuxt, TailwindCSS, Javascript, HeadlessUI

- **Personal Portfolio Website**

A portfolio website to showcase my skills and personal projects.

Technology Used: Nuxt, TailwindCSS

- Managed module migration, strategically refactoring code to improve readability and performance.
- Executed a comprehensive revamp/creation of logs for existing modules, improving tracking and monitoring capabilities for enhanced system management.
- Engaged in discussions with various departments to gather and understand their specific requirements, aligning development efforts with organizational objectives.

May 2022 - July 2023

Front End Web Developer *Limitless Technology Group*, Kuala Lumpur, Malaysia

- Developed and maintained Shopify e-commerce storefronts by implementing custom features using JavaScript, jQuery, HTML, CSS, and Shopify Liquid.
- Collaborated closely with designers and QA engineers to redesign the FlowerChimp shopping cart experience, simplifying the checkout journey and improving overall user experience.
- Revamped the FlowerChimp homepage and product pages to improve customer engagement, visual consistency, and product discoverability.
- Migrated legacy Shopify themes from Online Store 1.0 to Online Store 2.0, modernising storefront architecture and improving long-term maintainability.
- Optimised frontend performance using browser performance profiling, reducing Cumulative Layout Shift (CLS) from 0.19 to 0.025, improving Core Web Vitals and Lighthouse performance scores.

October 2021 - April 2022

Front End Web Developer *The Hacker Collective*, Petaling Jaya, Selangor, Malaysia

- Collaborated with backend developers and designers to deliver responsive, accessible, and cross-browser compatible web applications.
- Built landing pages and marketing websites using modern frontend technologies while maintaining responsive design best practices using Nuxt3 and TailwindCSS.

August 2019 - October 2021

Mechanical Engineer *Durianê Professionals Sdn Bhd*, Melaka, Malaysia

- Prepared engineering proposals, cost estimations, and feasibility studies to support client decision-making during project planning.
- Produced technical documentation, design specifications, tender documents, and evaluation reports, assessing contractor pricing, technical compliance, and project capabilities.
- Designed fire protection systems for semiconductor manufacturing facilities and commercial buildings in compliance with Malaysia Standards (MS), NFPA, and FM requirements, ensuring regulatory approval and insurance compliance.
- Coordinated with architects, surveyors, contractors, and multidisciplinary engineering teams to streamline design reviews, resolve technical issues, and ensure successful project delivery.

EDUCATION

2019

B.Eng (Honours) Mechanical Engineering
Multimedia University, Melaka, Malaysia
